

ANIRBAN BANERJEE

anirban.banerjee2016@gmail.com | (+91) 9339826922 |  GitHub |  LinkedIn

SKILLS

- ❖ **Programming:** C, C++, Java and Python
- ❖ **Web Development:** HTML, CSS, JavaScript, Bootstrap, MERN Stack and Java Full Stack
- ❖ **Cloud Computing:** AWS
- ❖ **Database:** SQL
- ❖ **Data Structures and Algorithms**
- ❖ **Framework:** Spring Boot
- ❖ **Graphic Designing:** Canva
- ❖ **Foreign Language:** German

EDUCATION

- ❖ Computer Science Engineering with Specialization in Cyber Physical System | Vellore Institute of Technology, Chennai CGPA: 8.90 | 2025
- ❖ XII (ISC) | St. Patrick's H.S. School, Asansol 89.8% | 2021
- ❖ X(ICSE) | St. Patrick's H.S. School, Asansol 92.0% | 2019

Certifications

- ❖ Certificate for Completion of C Training, Indian Institute of Technology, Bombay.
- ❖ Certificate for Completion of Advanced Cpp Training, Indian Institute of Technology, Bombay.
- ❖ Certificate for the Completion of Java Training, Indian Institute of Technology, Bombay.
- ❖ Certificate for Completion of Python 3.4.3 Training, Indian Institute of Technology, Bombay.
- ❖ NPTEL (Cloud Computing), Indian Institute of Technology, Kharagpur.
- ❖ MERN Full Stack Internship Program, ETHNUS.
- ❖ Java Full Stack, iamneo (Formerly Examly).

Patents & Publications

- ❖ **Patent:** DEVICE AND METHOD FOR COLD STORAGE OF FOOD ITEMS (Published: 31/01/2025)
Application Number: 202541006320

ACADEMIC PROJECTS

- ❖ **Portfolio Website (React.js):**
Created a responsive portfolio using React, featuring projects and skills. Integrated Formspree for contact form email submissions and deployed on Netlify.
 Deployment: [Portfolio Website](#)
- ❖ **Expense Management System (MERN Stack):**
Developed an expense tracker with user authentication, CRUD operations, and visualization. Users can categorize expenses, view total spending, analyze category-wise percentage via graphs, sort by date, and edit/delete transactions.
 GitHub: [Expense Management Repo](#)
- ❖ **E-commerce Prototype (MERN Stack):**
Built a full-stack e-commerce app with authentication, CRUD operations, and SEO. Used Nodemon, Bcrypt, React Helmet, Axios, CORS, and React Hot Toast for optimization.
 GitHub: [E-commerce Prototype Repo](#)
- ❖ **Student Record Management System Project.**
Developed a MERN stack application for seamless CRUD operations on student records. Demonstrated proficiency in MongoDB, Express.js, React, and Node.js through effective front-end and back-end integration.
 Deployment: [Live App](#)

❖ **Student Management System API with Spring Boot and Postman.**

This project is a Spring Boot application that functions as a student management system API. It provides endpoints for creating, updating, reading, and deleting student details such as ID, name, email, and department using Postman for API calls.
